Stramit® Half-Round and Flat-Back Gutters are manufactured from genuine COLORBOND® steel for durability and reliability.

The contemporary profiles provide huge water-carrying capacity and can also be supplied with overflow slots.

The gutters are available in a wide range of colours, with a complete range of accessories.

150mm Half-Round Gutter

The classic lines of the half-round gutter are suitable for any home design.

- ✓ Full range of 20 COLORBOND® colours plus ZINCALUME®
- ✓ Cast external brackets
- ✓ Cast internal/external corners

150mm Flat-Back Gutter

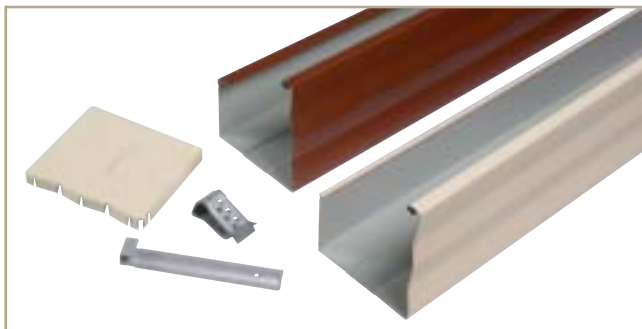

The Stramit® Flat-Back Half-Round Gutter offers a smooth, clean appearance free of external support brackets.

The curved shape of the gutter aids self-cleaning.

- ✓ Full range of 20 COLORBOND® colours plus ZINCALUME®
- ✓ Smooth external appearance
- ✓ Fast installation with snap clips and stiffeners

Triline™ Gutter

Stramit Triline™ gutter is available slotted or unslotted, in hook back or stiffened back versions, with all accessories.

The new Triline™ gutter from Stramit Building Products turns guttering into an architectural feature. Designed with the home improvement market in mind, Triline™ gutter combines good looks with excellent water-carrying capacity. A choice of fixing methods makes it suitable for fascia or patio applications. Stramit Triline™ Gutter is manufactured from genuine BlueScope steel for durability and reliability. It is available in a wide range of standard COLORBOND® colours and selected COLORBOND® Hi-Gloss finishes (in stiffened back version only).
